

Fuel Surcharge

With the continued volatility of fuel prices and the seemingly continued increase in pricing we have implemented a fuel surcharge effective from 1 September 2005.

The surcharge for December 2016 will be 4.4%; 91 octane was at \$1.779 at the end of November. This will alter month by month based on the pump price of 91 octane fuel per litre on the last day of the previous month, see table below.

The fuel surcharge will only apply to jobs that are delivered by a courier that is using a vehicle that is powered by a petrol or diesel motor. All deliveries made by our bicycle couriers will not incur a fuel surcharge.

As fuel is the biggest on-going cost for our contractors we will be passing on the entire fuel surcharge to them.
